What are Comprehensive Community Support Services?

Comprehensive Community Support Services are activities/services necessary to allow children to live with maximum independence in the community.

Services include:

- Skills training
- Cueing
- Supervision of behavior
- Medication Adherence Support
- Assisting client in learning about/recognizing symptoms
- Psychoeducation regarding side effects of medication
- Behavioral intervention
- Behavioral support
- Behavioral skills training
- Assistance with accessing community resources
- Emotional regulation skills development and practice
- Crisis management/development of crisis coping skills
- Developing/enhancing interpersonal skills
- Teaching parenting skills to youth who are parenting.

How are referrals made to S.K.Y.E.S. Community Support Services?

When a youth has been identified for referral to community support, the following steps should be taken:

If the parent or school wishes to make the referral, the youth's clinician should be contacted to discuss and assist with the referral.

The clinician will see the youth for treatment planning and add community support to the youth's treatment plan if the youth meets the criteria.

Once the treatment plan has been updated and necessary authorizations are secured, a Community Support Associate (CSA) will be assigned.

S.K.Y.E.S. Community Support Associates (CSAs) can work with youth for up to 3 hours per day. Services can be provided at school, in home or in the community....wherever services are needed most.
